Subject Index

– A –

ABO blood group: development of A antigen on *E. coli* Y1089 and Y1090 411
Adenoviruses: evasion of immune recognition 59
Adjuvant arthritis: inhibition by phosphosugars and castanospermine 369
Affinity maturation: location and timing of antigen-driven mutation 145
AIDS: diversity and variation of HIV 215
Alastair Cunningham: a biography of his work 111
Anti-CD8 blocking: assessment of T cell–target interaction 259
Antibody generation: importance of B and T cell collaboration 153
Antibody diversity: generation of, after antigen 111
Antigen receptor loci: maintenance by selective pressure 397
Antibody responses to influenza virion proteins 181
Antigen-driven hypermutation of immunoglobulin genes 145
Antigenic diversity in blood stages of *Plasmodium falciparum* 201
Antigenic variation of HIV 215
Antigenic variation in influenza virus neuraminidase 209
Antigenicity: effect of VP7 relocation to the cell surface membrane: 73
Arthritis: inhibition by phosphosugars and castanospermine 369
Autoimmunity: biography of Macfarlane Burnet 159
Autoimmunity to heat shock proteins 295

– B –

B cell receptor: maintenance of gene loci through selection 397
B cell response to a T cell-dependent antigen 119
BCL1 B cell lymphoma: induction of proliferation 315
B lymphocyte D8/17 alloantigen: frequency in North Indian patients with rheumatic heart disease 9
B and T cell collaboration for antibody generation 153
Bioethics: value issues in biomedical science 363
Bovine leukaemia virus infection: T lymphocyte responses 329
Burnet: clonal selection theory 159

– C –

C-type adenoviruses: down-regulation of E1a expression 65
C-type adenoviruses: evasion of immune recognition 59
Carcinoma of the colon: characterization of cell lines 227
Castanospermine: inhibition of adjuvant arthritis 369
Caucasians: T cell receptor α-chain allele frequencies 253
$CD4^+$ T lymphocytes: cytotoxicity mechanisms 379
CD8: role in T cell–target interaction 259
Cell-mediated immunity to parasite infections 343
Clonal selection theory: biography of Macfarlane Burnet 159
Colonic carcinoma: characterization of cell lines 227
Common mucosal immune system: local immunity in the male reproductive tract 301
Community relations: value issues in biomedical science 363
Cross-reactive organisms: moulding of immunity by early exposure 405
Cytokine stimulation of Fc receptor expression 97
Cytotoxicity mechanisms employed by $CD4^+$ T lymphocytes 379

– D –

Dendritic cells in the rat oral mucosa 33

– E –

E3 gene products: down-regulation of E1a expression 65
E3 regions: evasion of immune recognition by adenoviruses 59
Eicosanoid synthesis by murine fetal thymic non-lymphoid cells 237
Eimeria tenella: H_2O_2 release from immune chicken leucocytes following infection 41
Endotoxin treatment: effects on metabolism in tumour-bearing rats 1
Energy depletion: effects on IL-2 receptor expression 309
Epitope expression in colonic carcinoma 227
Erythrocyte membrane deformability induced by *Plasmodium falciparum* 267
Escherichia coli: development of A blood group antigen on Y1089 and Y1090 411

Ethics: value issues in biomedical science 363

– F –

Fc receptor expression in U937 cells 97
FcγRII polymorphism: effect of nucleotide substitutions 79
Fetal thymic lobes: prostaglandin synthesis in the mouse 237
Flavivirus: lysing of by restimulated memory Tc cells 259
Forbidden clones: biography of Macfarlane Burnet 159

– G –

Graft-versus-host reaction: lymphokine production during 51
Granulocyte–macrophage colony-stimulating factor: induction of BCL1 proliferation 315

– H –

H_2O_2 release from immune chicken leucocytes following infection with *Eimeria tenella* 41
Heat shock proteins: immunity to in rheumatoid arthritis and systemic lupus erythematosus 295
High responder FcγRII: binding of IgG1 79
Histocompatibility locus expression: stimulation by PMA 97
HIV: diversity and variation of 215
Homing of T cells: role in malarial immunity 405
Human adenoviruses: evasion of immune recognition 59
Human immunodeficiency syndrome: diversity and variation of 215
Hymenolepis nana: macrophages and protective immunity to 417
Hypermutation of immunoglobulin genes 145
Hypermutation of rearranged mouse V-D-J genes 129

– I –

IgG1 binding of FcγRIIa 79
Immune class regulation: subversion of response to parasite infection 343
Immune recognition: avoidance by retroviruses 193
Immune recognition: evasion by adenoviruses 59
Immune response: role in progression from HIV to AIDS 215
Immunity to malaria: role of spleen and T cell homing 405
Immunity in salmonids following vaccination with *Vibrio anguillarum* 391
Immunoglobulin transportation into cutaneous transudates 323
Influenza-immune Tc population: lysing of immune targets 259
Influenza virus neuraminidase: antigenic variation in 209
Influenza virion proteins: antibody responses to 181
Interleukins: proliferative response of BCL1 B cell lymphoma 315
Interleukin-1: release by IL-2-induced LAK cells 15
Interleukin-2: induction of lymphokine-activated killer cells 15
Interleukin-2 receptor expression: effect of human lymphocyte energy depletion 309

– K –

Keyhole limpet haemocyanin: lymphokine production following injection with 51
Kunjin-immune Tc population: lysing of immune targets 259

– L –

Leishmania donovani: *in vitro* multiplication 25
Leprosy: limiting dilution analysis in 277
Leucocytes: H_2O_2 release from immune chicken leucocytes following infection 41
Limiting dilution analysis in leprosy 277
Lupus erythematosus: immunity to heat shock proteins 295
Lymphocyte energy depletion: effect on IL-2 receptor expression 309
Lymphoid tissue in rat oral mucosa 33
Lymphokine-activated killer cells: induction by IL-2 15
Lymphokine expression *in vitro* and *in vivo* 51

– M –

Macrophages in protective immunity to *Hymenolepis nana* 417
Macrophages in the rat oral mucosa 33
Major histocompatibility complex: control by adenovirus E3 region 59
Major histocompatibility complex: role in T cell memory 337
Malaria: role of spleen and T cell homing in immunity 405
Membrane deformability of erythrocytes by *Plasmodium falciparum* 267
Memory cytotoxic T cells: interactions of naive versus restimulated populations 259
Memory T cells: role of MHC class II molecules 337
MESA/PfEMP2 protein: conservation of repeating structures 353
Metabolism: effects of endotoxin 1
Mixed lymphocyte culture reaction: role of TNF-α 107
Mucosal immune system: local immunity in the male reproductive tract 301

Murine fetal thymus: prostaglandin synthesis by 237
Mutation distribution around rearranged mouse V-D-J genes 129
Mycobacterium bovis: heat shock proteins of and immunity to 295
Mycobacterium leprae: response of leprosy patients 277

– N –

Neuraminidase-antibody complexes following influenza infection 209
Non-responder FcγRII: binding of IgG1 79
North Indian patients and rheumatic heart disease 9

– O –

Oral mucosa: structure and function of lymphoid tissue in 33

– P –

Parasite-specific antigens: cell-mediated immunity to 343
PBMC proliferation: inhibition by U937 suppressor factor 89
Pentamidine: effect on *in vitro* multiplication of *Leishmania donovani* 25
Peripheral blood lymphocytes: inoculation with bovine leukaemia virus 329
Peripheral blood mononuclear cells: limiting dilution analysis in leprosy 277
Peritoneal macrophages: *in vitro* multiplication of *Leishmania donovani* in 25
PfEMP2/MESA protein: conservation of repeating structures 353
Phenotypic characterization of colonic carcinoma cell lines 227
Phosphosugars: inhibition of adjuvant arthritis 369
Plasma leakage of immunoglobulins 323
Plasmodium falciparum: antigenic diversity and variation during blood stages 201
Plasmodium falciparum: conservation of repeating structures in the PfEMP2/MESA protein 353
Plasmodium falciparum: induction of changes to erythrocyte membrane deformability 267
Plasmodium falciparum: repetitive REP51 sequence 357
PMA: stimulation of Fc receptors in U937 cells 97
Polynesians: T cell receptor α-chain allele frequencies 253
Post-thymic tolerance by the clonal deletion of self-reactive T cells within the thymus 49
Proliferative response of B and T cells 119
Proliferative response of BCL1 B cell lymphoma 315
Proliferative response: effect of U937 suppressor factor 89
Proliferative response of MLC to TNF-α 107
Prostaglandin synthesis by fetal thymic lobes 237
Protective immunity to *Hymenolepis nana*: role of macrophages 417

– R –

Rat oral mucosa: structure and function of lymphoid tissue in 33
REP51: repetitive sequence in *Plasmodium falciparum* 357
Repetitive REP51 sequence in *Plasmodium falciparum* 357
Repetitive structures in the PfEMP2/MESA protein of *Plasmodium falciparum* 353
Reproductive tract, male: local immunity 301
Retroviral diseases of the immune system 193
RFLP polymorphisms for T cell receptor alleles 253
Rheumatic heart disease: frequency of B lymphocyte D8/17 alloantigen 9
Rheumatoid arthritis: immunity to heat shock proteins 295

– S –

Salmonids: immunity following *Vibrio anguillarum* vaccination 391
Selective pressure: maintenance of T and B receptor loci 397
Self-tolerance by the clonal deletion of self-reactive T cells within the thymus 49
Sexually transmitted disease: local immunity in the male reproductive tract 301
Sodium stibogluconate: effect on *in vitro* multiplication of *Leishmania donovani* 25
Somatic hypermutation of immunoglobulin genes 145
Somatic hypermutation of rearranged mouse V-D-J genes 129
Spleen: role in malarial immunity 405
Suppressor factor U937: inhibition of PBMC proliferation 89
Systemic lupus erythematosus: immunity to heat shock proteins 295

– T –

T and B cell collaboration for antibody generation 153
Tc cells: interactions of naive versus restimulated populations 259
T cell-dependent B cell responses *in vivo* 119
T cell homing: role in malarial immunity 405
T cell memory: role of MHC class II molecules 337
T cell receptor allele frequencies in Caucasians and Polynesians 253

T cell receptor expression: effect of U937 suppressor factor 89
T cell receptor: maintenance of gene loci through selection 397
T cell receptors: interactions with retroviruses 193
T cell tolerance by the clonal deletion of self-reactive T cells within the thymus 49
T lymphocytes: cytotoxicity mechanisms of $CD4^+$ cells 379
T lymphocytes: expression of lymphokines 51
T lymphocytes: responses to bovine leukaemia virus infection 329
Technetium-99m-labelled anti-fibrin monoclonal antibodies: detection of vascular thrombi 159
Thrombus detection using technetium-99m-labelled anti-fibrin monoclonal antibodies 159
Thymus: clonal deletion of self-reactive T cells within the thymus 49
Tissue-specific phenotype: retention in colonic carcinoma cell lines 227
Tolerance by the clonal deletion of self-reactive T cells within the thymus 49
Transferrin leakage 323
Transgenic tehniques: use of to direct expression of a non-self gene 49
Transudates: immunoglobulin transport into 323
Tumour-bearing rats: effects on metabolism of endotoxin 1
Tumour necrosis factor: release by IL-2-induced LAK cells 15
Tumour necrosis factor-α: role in human mixed lymphocyte culture reaction 107

– U –

U937 cells: expression of Fc receptors in 97
U937 suppressor factor: inhibition of PBMC proliferation 89
Urinary tract, male: local immunity 301

– V –

V-D-J hypermutation 129, 145
Vaccination with *Vibrio anguillarum*: immunity in salmonids 391
Vaccinia virus: lysing of by restimulated memory Tc cells 259
Value issues in biomedical science 363
Vibrio anguillarum: immunity in salmonids following vaccination 391
Viral mRNA: translational interference by E3 adenovirus protein products 65
Virion proteins in influenza 181
VP7 relocation to the cell surface membrane 73

– Y –

Y1089 and Y1090: development of A blood group antigen in *E. coli* 411
